Robust Baby Change Stations

MacDonald Industries offer your childcare centre robust, hygienic and a cost effective range of baby change stations.

MacDonald's
offer the widest
selection of Baby
Change Stations
in NZ.

More sizes and
options available.

Commercial Grade Baby Change Station

Our robust Change Stations can be vertical or horizontal mounted to suit your changing rooms. They are made from durable HDPE (High Density Polyethylene) construction.

- Rated to support static load of 110kgs.
- Built in bed liner dispenser.
- Bacteria resistant polyethylene liners.
- Moulded paper bed liner dispensers.
- Safety straps for security.
- Durable paper changing station bed liners (500 per carton)
- Pneumatic gas strut closures ensures smooth, safe opening and reliable closing.

Models

- BR-100-EV - Vertical Mounted
- BR-100-EH - Horizontal Mounted

Special Needs Change Station

Our change station for special needs children is stainless steel fabricated and horizontally mounted.

- Insulated polystyrene replaceable tray liner.
- Static weight tested to 180kgs.
- Safety belt with cam buckle - adjustable with one hand.
- Recess mounted (can be surface mounted with additional flange).

Model

- BR-100-SSE - Horizontal Mounted

Durable Wash Troughs

Our Franke high quality stainless steel wash troughs are ideal for use in early childhood centres.

Franke wash troughs can be installed using manual or electronic wall mounted taps or with the 70mm ledge, deck mounted taps too.

The troughs are wall mounted using integrated brackets, including stainless steel screws and dowels. Available with 40mm left or right hand waste. Franke stainless steel wash troughs are made from Type 304, 0.8mm stainless steel with surface satin finish.

All troughs are available with optional 266mm high backsplash to protect the wall behind.

Models

- **FR-ECN6L/R** - L-600mm length
- **FR-ECN12L/R** - L-1200mm length
- **FR-ECN18L/R** - L-1800mm length

FR-ECN6L

Hygienic Tap Solutions

We offer a broad range of taps which can compliment your childcare facility making hygiene easy for little hands. These are just some examples.

Deck Mounted Temposoft Push Tap

Soft push operation is very easy to activate by children. Automatically shuts-off after 15 seconds and has pre-set 3l/min flow rate giving a 70% water saving. The flow rate is adjustable to allow for pressure variations. Durable chrome-plated solid brass. It is vandal proof and designed for extensive use.

- **DE740500** - 6 star rating

Wall Mounted TempoSoft Push Tap

An automatic soft push operated bib tap. Automatically shuts-off after 15 seconds and has a pre-set 3l/min flow rate, giving a 70% water saving. Durable chrome-plated solid brass with flow straightener. It is vandal proof and designed for extensive use.

- **DE741550** - 6 star rating.

Deck Mounted Lever Tap

Activated by pushing the lever in any direction. Automatically shuts-off after 15 seconds and has pre-set 4l/min flow rate giving a 60% water saving. Durable chrome-plated solid brass.

- **DE745450** - 6 star rating

Under Bench Thermostatic Mixer

With any of the above taps you need to choose whether they are supplied with cold water or mixed water. If your choice is mixed, you must fit a quality thermostatic mixer to ensure water temperature stability. The Delabie under bench mounted mixer will deliver mixed water at ~42°C for up to 4 taps.

- **DE733015** - 1/2" inlet/outlet

Wall Mounted Cleaners Sinks

The Franke stainless steel cleaners sink combines function and durability making cleaning up around childcare centres hygienic and safe.

The Franke cleaners sink is a one piece pressed bowl, supplied with galvanised steel support brackets, designed to be wall mounted. It is available with or without a bucket grid.

Optional back splash ensure wall protection.

Models

- **FRCS** - Standard wall hung sink with mounting brackets, 40mm waste not included.
- **FRCSH** - As above but with bucket grid fitted.
- **FRCS-BS** - Standard 600mm high backsplash.
- **FRCS-BS2** - Angled backsplash used where sink is installed into a corner wall requiring protection.

AS0690-618

Sink Faucet, Hose and Hanger Bracket

The Zurn Mop Sink Faucet is specifically designed for use in the cleaners room. The Zurn hose and hanger bracket allows for easy filling of buckets. Hanger bracket allows for the hose to be held away from the sink when not in use.

Models

- **Z-SF** - Sink Faucet
- **Z-HH** - Hose and Hanger Bracket

Mop Hanger Bracket

Stainless steel hanger bracket allows for mops and brooms to be neatly stored. If positioned over the sink it allows for mops to drip directly into the sink.

Models

- **AS8215-3** - 3 station hanger 660mm length

Shelves

1.2mm stainless steel shelves with 10mm depression allowing storage of cleaners provisions minimising potential spillage. Available in 150mm or 200mm depth.

Models

- **AS0690-618** - 150 x 450mm
- **AS0690-624** - 150 x 600mm
- **AS0690-818** - 200 x 450mm
- **AS0690-824** - 200 x 600mm

Floor Mounted Cleaning Sink

This multi use cleaning sink can be integrated into your child care centre and used by cleaners, educators and children.

Zurn floor mounted cleaning sinks are more like a deep shower tray than a conventional cleaners sink. Because they are floor mounted they are also great for washing down kids feet and hands after messy play.

Molded from a composite stone and resin compound.

Normally installed into the corner of a room, with optional stainless steel backsplashes giving wall protection where needed. Optional bumper guards offer edge protection to 2 exposed top edges of sink.

Models

- Z-1996-24 - 600 x 600mm cleaning sink
- Z-1996-36 - 600 x 900mm cleaning sink

Available with bumper guards and wall guards for added protection

TIP
These sinks are best fitted with our Delabie Shower Kit.

Shower Kit

Our Delabie Shower Kit is a perfect match for the floor mounted Cleaning Sink.

Delabie thermostatic shower kit has auto-draining device and thermal insulation. This Securitherm mixer is equipped with a thermostatic cartridge to regulate the temperature precisely, even if there are pressure variations between the hot water and cold water inlets. This means automatic anti-scalding safety.

The whole body insulates the hot water supply allowing the surface to remain at ambient temperature, removing the risk of accidental burning.

The Securitherm shower mixer is fitted with a flow regulator set at 12ℓ/min which offers a saving of up to 60% compared to other mixers (16-20ℓ/min) regardless of changes in the water pressure. This not only saves water

volume but also saves energy in heating less hot water.

The Ergo control handles provide easy operation, and is attached to a flexible 850mm smooth PVC hose.

Finished in chrome-plated brass.
