

# DE160130 DELABIE BOB THROUGH WALL WASHBASIN

## DESCRIPTION

The Delabie BOB Through Wall Washbasin is specifically designed for secure installations where plumbing services are accessed from a rear service duct, making it ideal for correctional facilities, healthcare, mental health and other high-security environments. Manufactured from bacteriostatic 304 stainless steel with a polished satin finish, it provides outstanding durability, hygiene and corrosion resistance.

Featuring a through-wall fixing system with a cut-to-size 200mm threaded rod, the basin can be securely installed through a variety of wall thicknesses. Its vandal-resistant design incorporates a shrouded basin, concealed plumbing, recessed horizontal waste outlet and a flat perforated waste without exposed screws for improved hygiene and ease of cleaning. Rounded edges enhance user safety while maintaining a clean, contemporary appearance.

The basin has a 310mm internal diameter and is supplied complete with fixing elements. Manufactured without an overflow, it is CE marked, complies with EN 14688, and is backed by Delabie's industry-leading 30-year warranty.
