

DE1801T2

BIOCLIP

WALL MOUNTED BASE AND SPOUT

DELABIE

DESCRIPTION

DELABIE DE1801T2 BIOCLIP spout is a wall mounted spout L.186mm and base with smooth interior surface. The BIOCLIP spout can be removed entirely from its fixed base allowing for curative or preventative cleaning/disinfection. BIOCLIP mixers and taps allow healthcare facilities to establish regular cleaning protocols to eliminate Biofilm and bacteria. Spouts with smooth interiors have 14x less Biofilm contamination than spouts with standard rough interiors. Suitable for all non-contact controls including electronic sensor, knee valves and foot valves.

Supplied with either 1x disposable Hostaform spout or 2x removable chrome plated stainless steel spouts. Spout can also be replaced with a BIOFIL filter (see BIOCLIP spouts).

Spout is for use in combination with handsfree fittings such as electronic sensor, or knee and foot operated valves.

We recommend installing a thermostatic mixing valve (see Water Tempering section).

PRODUCT ADVANTAGES

- Mounted with hygienic flow straightener avoids water retention (limits risk of bacteria development).
- Removable fitting for disinfection.
- Wall mounted connection M1/2".
- Flow rate limited to 7L/min at 300kPa.
- Different spout options; 1x disposable Hostaform spout L.186mm, 2x chrome plated stainless steel removable spouts L.190mm, 1x BIOFIL sterile filter spout L.199mm.

MODELS

DE1801T2 - Standard model with disposable spout.

DE1084T2 - Same as DE20801T1 but with 2 removable BIOCLIP spouts.
