

## DV-081B-1

# INWALL FIXING BRACKET FOR BASIN WITH UPSTAND WITH CUT-OUT FOR MS-DV041/042 SECURITY BASIN SET

**KWC DVS**

### DESCRIPTION

The DV-081B-1 is a heavy duty inwall mounted bracket designed to securely fix the DV-VR01-081 or DV-VR01-031 security basins where there is no direct duct space behind the basin to allow for conventional through wall mounting. The bracket allows for easy mounting of the MacDonald Security boxes. ( See MS-DV0xxx).

The frame is fixed to wall framing using the coach screws supplied prior to wall lining. Waste connections have suitable penetrations through the bracket.

Final connections should be completed once wall lining is finished, therefore it is imperative that a suitable access panel be installed above and below the basin. We recommend ZA/HD 345 x 345 stainless steel access panels be installed. Refer to separate literature to ensure correct access panel is specified.

### INSTALLATION

Inwall frame fixed to wall framing prior to wall lining using coach bolts supplied. Mounting height to suit required basin height.

Recommend twin stud walls to ensure correct support.

Minimum wall cavity required 140mm

### MODELS

**DV-081B-1** - Inwall Fixing Bracket
