

EL-ECTRUA151550 ELKAY CROSSTOWN SHALLOW SINK

DESCRIPTION

The EL-ECTRUA151550 Elkay Crosstown kitchen sink is ideal for accessible kitchens because of the shallow depth of the sink.

At 125mm deep, the sink fits perfectly in your kitchen worktop allowing a person in a wheelchair to sit in below the sink without it hitting their legs.

Used in combination with our Pressalit height adjustable kitchen lifts, this will allow the user freedom to work unimpeded at the kitchen sink.

The shallow depth not only means that it won't get in the way of their legs, but the shallow depth also means the user doesn't need to reach far to pick up items from the sink surface, and open or close the waste.

We supply the sink with a 3-1/2" stainless steel sink basket waste.
