

# FRCS AND FRCSH

## KWC FRANKE STAINLESS STEEL CLEANERS SINK WITH BUCKET GRID

### DESCRIPTION

KWC Franke FRCS is a wall mounted, one-piece pressed Type 304 stainless steel cleaners sink. Available with or without a back-splash and with or without a bucket grid.

KWC Franke high quality cleaners sinks are ideally suited for installation in industrial workshops, sports facilities, school bathrooms, hospitals, care facilities and early childhood education facilities.

These sinks are best fitted with our Zurn Z-SF sink faucet (see separate data sheet) which comes with an integrated vacuum break and bucket hook on the spout.

The splash back is a loose stainless steel sheet that requires direct fixing to the wall behind above the sink. It has a small joggle which slides over the turned up back stand of the sink. The splash back is available as either a single sheet which fits behind the sink, or as a 2 sided panel which can fit behind and to the side of the sink, provided the sink is mounted hard to the corner of the room.

NOTE: 40mm Waste is not included.

### MODELS

- FRCS** - Standard cleaners sink, no bucket grid
- FRCSH** - Standard cleaners sink with bucket grid (as shown)

- FRCS-BS** - Stainless Steel Backsplash 600mm x 600mm
- FRCS-BS2** - Angled stainless steel backsplash used when sink is installed into a corner 600mm (back width) x 500mm (side width) x 600mm (height)
