## MATERIALS

Frameless stainless steel mirror with masonite back 20 gauge is fabricated from Type 304 stainless steel, No.8 mirror finish. Backing is 6mm thick tempered water resistant masonite. Unit has 8mm returns to wall all around. Unit is provided with four 5.5mm dia. mounting holes (fixings by others).

## DESIGNERS NOTE

The reflective quality of a stainless steel mirror is not as true as plate glass. It is not recommended that a mirror of this type be made larger than 48"x24" (1219x610mm) because image quality (distortion) degrades with increased surface size.

## INSTALLATION

Surface mount unit to wall using hardware supplied by installer through four mounting holes provided.
