

KAHA

PLASTIC ACCESS DOOR FOR WALLS & CEILINGS

DESCRIPTION

The Handi-Access plastic door is suitable for all surfaces and can be installed easily by applying glue or caulking adhesive to the back of the frame and pressing into place. Ideally suited for walls where a service valve, flush valve or some other product needing access for regular access or for maintenance.

Door and frame are made from high impact styrene plastic and the door is both hinged and removable for unobstructed access. The door panel is held closed by a snap friction catch and easily opens without the use of special tools. The finish is in white with attractive lightly textured exposed surfaces for painting/papering.

MODELS

KAHA88 - 200 x 200mm

KAHA1414 - 350 x 350mm
