DELABIE

MS-747 THROUGH WALL TIMED FLOW CONTROL VALVE - TO SUIT HIGH SECURITY BASINS

MS-747..

MS-747... -ACC

DESCRIPTION

A vandal resistant through wall water control which is designed to be installed where there is an accessible duct directly behind the basin.

- The valve set is supplied with a 75mm dia. escutcheon plate.
- Pressing the valve button initiates immediate water flow.
- On release of button water will stop flowing within 15 seconds.

Also available with an extended round headed button to suit accessible bathrooms.

INSTALLATION

• 1/2" BSP supply connection.

200 or 150mm

- Where required, mixed water is recommended to be tempered to ~40°C using a quality thermostatic mixing valve such as the Wilkins W19-1070.
- Available in three sizes to suit walls ≤150mm or ≤200mm thick, or without extension tubes for use through a panel.

The panel version is suitable when installed on the Franke combi extension box (ref. FRCM-EXT). The panel model is supplied without the escutcheon plate and when ordered as part of a set, extension box backsplash will be drilled to suit. Can be combined with a Zurn flush valve using the same button set, ref. ZH6152XL-VP.

MODELS

MS-747-115 - To suit walls ≤150mm MS-747-120 - To suit walls ≤200mm MS-747-03 - To suit through panel installations

OPTION: MS-747...-ACC - With extended accessible button head
