

MS-747-DV.. THROUGH WALL WATER TIMED FLOW VALVE - TO SUIT HIGH SECURITY BASINS

DELABIE

DESCRIPTION

The MS-747-DV.. is a through wall actuated basin valve, designed to be used on basins where a high degree of vandal resistance is required.

Ideal for use with DV-VR01-031 basins, where there is a duct directly behind the basin allowing for through wall connection of all fittings.

Pressing the button initiates a 15 second run time of the timed flow valve. The valve does not include any spout as the DV-VR01-031 basin has a built in spout.

MODELS

MS-747-DV20 - Suitable for walls $\leq 200\text{mm}$

MS-747-DV15 - Suitable for walls $\leq 150\text{mm}$

Also available with extended accessible button, add suffix -ACC to the end of product code.
