-SP panel

DESCRIPTION

MS-AP heavy duty access panels are designed to give general access to inwall mounted valves plus, more specifically, recess mounted ZURN single flush, flushing valves where a heavier duty panel is preferred over the standard ZA access panel.

Panel fabricated in 2.0mm Type 304 stainless steel with a No 4 brushed finish and radiused edge. Standard size 345 x 345 but also available as -SP 345 x 450 where greater access is required.

MS-AP access panels are available;

- Blank - to suit valves where the button is remotely mounted from the valve.
- Blank with high mirror finish for mounting above basin 345 x 450
- Blank powder coated warm white to match KWC high security composite basins and toilets 345 x 450
- With 38mm hole - to suit valves where Zurn button is to be mounted on the panel.
- With 35mm hole - to suit Zurn valves supplied with VP buttons
- SP version 345 x 450

INSTALLATION

Wall should be framed to provide an opening as per dimensions shown (right) for screw fixing frame prior to lining. Do not set access panel frame further than 15mm from finished wall face. Ensure panel is positioned so button assemblies do not foul on valve body behind.

Ensure position of panel does not conflict button or sensor assemblies with toilet seat and/or lid. Where a disabled WC is installed ensure there is no conflict with any backrest.

SPECIFICATION

MacDonald Model MS-AP.... access panel and wall mounting frame all manufactured in Type 304 stainless steel. Panel 2mm with 2mm radiused edge.

MODELS

MS-AP-B	- Blank panel without button mounting hole
MS-AP-B-SP	- SP panel without button mounting hole
MS-AP-BM-SP	- SP panel without button mounting hole, mirror finish
MS-AP-BW	- Blank panel without button mounting hole, powder coated warm white
MS-AP-BW-SP	- SP panel without button mounting hole, powder coated warm white
MS-AP-ZH	- Standard panel with 38mm hole to suit Zurn button
MS-AP-VP	- As per MS-AP-ZH but with 35mm hole to suit VP button set
