

## **Z7000-VB** STANDARD INLINE VACUUM BREAKER

### **DESCRIPTION**

The Zurn Z7000-VB inline vacuum breaker is designed for use in the shower where a shower hose is fitted to prevent the backflow of water. Inlet and outlet are 1/2". The female connection attaches to the water supply fixed wall elbow and the shower hose connects to the male outlet. Arrow on vacuum breaker should point in the direction of the water flow. The body is manufactured in brass with hard chrome finish.
