

DUAL FLUSH PUSH PANELS AND PUSH BUTTONS. FOR USE WITH: ZDF-6152XL FLUSH VALVES

DESCRIPTION

The range of dual flush push panels and push buttons shown below are for use with any Zurn Dual Flush flush valve. When specifying, ensure both the valve and push panel/button have been specified separately.

Refer to separate sheet for options and details on valve.

PUSH PANEL

ZDF-P Dual flush panel assembly with 150 x 210mm satin finish stainless steel panel and push plate. Suitable only where there is duct access behind.

ZDF-PA As above but with a 345 x 345mm access panel and frame.

ZDF-PC As above but with a 330 x 330mm access panel and frame with concealed fixing.

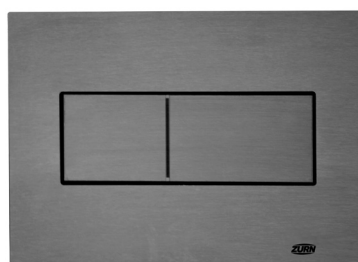

OPTIONS

All push panels, above, are supplied in a satin stainless steel finish. Optional push plates are available by inserting the following suffix after the above product code.

...SP Standard satin panel but with polished stainless steel push plate.

...SW Standard satin panel with raised white nylon push plate and braille (for accessible use).

...SWB As per SW with blue raised nylon push plate with braille (for accessible use).
